DuPont™ Nafion® PFSA Polymer Dispersions DE 520/521, DE 1020/1021, DE 2020/2021 perfluorosulfonic acid polymer

Polymer Dispersions

Description

DuPont™ Nafion® PFSA polymer dispersions contain perfluorosulfonic acid/PTFE copolymer in the acid (H^+) form, and are available in several polymer content and dispersant compositions. Typical uses include fabrication of thin films and coating formulations for fuel cell membranes, catalyst coatings, sensors, and a variety of electrochemical applications.

Order Information

Dispersions are available in the following containers (one gallon minimum order):

1 gallon container package (air or land delivery) for 1-2 gallon orders

5 gallon container (air or land delivery) for 3-5 gallon orders

55 gallon drum (net 50 gallons per drum, land delivery) for over 25 gallon orders

Packaging

Nafion® PFSA Dispersions in quantities of one gallon are packaged in fiberboard shippers, which meet DOT and UN standards for both domestic and international ground and air shipments. Larger shipping containers (up to 55 gallon drums) are available for domestic shipments.
